

**Fount Bio**

*Fount Bio is a Cambridge, Massachusetts-based clinical-stage life sciences company developing innovation and high-impact hyaluronic acid-based treatments for aesthetic dermatology and other medical indications. We employ a proprietary click-chemistry-based HA platform technology (Fl̄-HA platform) to create novel forms of HA with unique properties and capabilities. Our lead product, Fl̄-Derm, is the world's first product that builds crosslinked HA within the dermis to create long-lasting improvements in skin quality.*
