

Naturalis.Life.Technologies.

OUR CORE ACTIVITIES

Naturalis develops and manufactures innovative bioactive ingredients for cosmetic and dermo-cosmetic industries using the most advanced technological platforms. Professional skill and passion for nature and cosmetic sciences guide our research and allow to offer top-quality natural active ingredients with proven efficacy compliant with current worldwide regulations.

OUR VALUES AND SOCIAL RESPONSIBILITY

Naturalis, since ever, guarantees innovation, quality and safety to its customers, offering effective solutions that are the result of the balanced combination of nature and science. Naturalis inspires to the highest ethic principles turned towards the respect of nature and environment and sustain fair principles.

RESEARCH OF EXCELLENCE

Naturalis makes use of the most advanced analytical and R&D laboratories and invests in research & developments more than 25% of its annual sales. A team of biologists and chemists with PhD degree are the basis of the ability to create natural products of great innovative value.

QUALITY

From the raw material to the finished products, each step is rigorously monitored. Quality control laboratories analyze all raw materials entering the company and all final products at every stage for the presence of impurities as pesticides and PCB.

Naturalis works in accordance with the ISO9001:2015 standards and meets the requirements of standard ISO 22716 concerning Good Manufacturing Practices (GMP) of cosmetic products. All R&D and Quality control laboratories are certified ISO 17025

PRODUCTION

Advanced processes of both dynamic and static extraction, purification and concentration allow to isolate the biologically purest and most active molecules. Biologically active molecules with poor cutaneous bioavailability are then encapsulated into special elastic vesicles (Ultra-deformable Niosome), made of special natural polyglycerol esters. This kind of vesicle works as an effective delivery system capable of increasing the penetration of the molecule into the skin thousands of times. Naturalis has realized a portfolio of active ingredients able to satisfy the needs of the most exigent demands, coming from cosmetic and pharmaceutical industries.
