

THE POLITICS OF SOCIAL PSYCHOLOGY

Social scientists have long known that political beliefs bias the way they think about, understand, and interpret the world around them. This volume explores the complex and often contentious political influences within the field of social psychology. While most scientists aspire to be dispassionate observers, this volume reveals how political biases may affect theory development, the selection of hypothesis-testing and other methodologies, data analysis, and the interpretation of findings. The contributors, scholars from social psychology and related fields, use many of the major themes in social psychological research to examine the discipline itself, including the effects of motivated reasoning, attitudes, beliefs, values, goals, ideology, and prejudice. They also present solutions that may lead toward a more depoliticized social psychology that can become a model for discourse across the social sciences.

Jarret T. Crawford is a Professor of Psychology at The College of New Jersey. He is the author of over 50 publications on political psychology and intergroup attitudes.

Lee Jussim is a Professor of Psychology at Rutgers University. He has authored or edited five books (plus this one) and over 100 articles and chapters, focusing primarily on social perception and scientific integrity.

Frontiers of Social Psychology

Series Editors:

Arie W. Kruglanski, University of Maryland at College Park

Joseph P. Forgas, University of New South Wales

Frontiers of Social Psychology is a series of domain-specific handbooks. Each volume provides readers with an overview of the most recent theoretical, methodological, and practical developments in a substantive area of social psychology, in greater depth than is possible in general social psychology handbooks. The editors and contributors are all internationally renowned scholars whose work is at the cutting edge of research.

Scholarly, yet accessible, the volumes in the *Frontiers* series are an essential resource for senior undergraduates, postgraduates, researchers, and practitioners and are suitable as texts in advanced courses in specific subareas of social psychology.

Published Titles

Goal-directed Behavior

Aarts & Elliot

Social Judgment and Decision Making

Krueger

Intergroup Conflicts and their Resolution

Bar-Tal

Social Motivation

Dunning
