[Click here for the flyer!](#)

## JAMA Article: Association of Racial/Ethnic Segregation on Access to SUD Treatment in the U.S.

[Download Article](#)

## Is more frequent use of non-prescribed buprenorphine associated with lower risk of overdose?

Findings from this recent [literature](#) show that non-prescribed buprenorphine is associated with a lower risk of overdose, a "harm reduction consequence" of diversion.

# Primary care providers and specialists provide comparable buprenorphine treatment quality among North Carolina Medicaid Providers in this [study](#).
