The Division of Medical Assistance and Health Services, in collaboration with the Division of Mental Health and Addiction Services, launched a new program that covers and supports Medication Assisted Treatment (MAT) and Office Based Addictions Treatment (OBAT). This program supports NJ FamilyCare members with an addiction diagnosis through the delivery and coordination of multiple reimbursable services provided by primary care providers and community behavioral health specialists.

Physicians will be reimbursed for OBAT services through their managed care contracts. Any contracted provider who is Data 2000 waived for prescribing buprenorphine may participate.

Horizon NJ Health will also conduct educational webinars on the OBAT program, which will include information on the program components and requirements.

Since you are Data 2000, please complete the survey below and fax to:  
Attn: OBAT Survey at **1-609-583-3004**.

(Please check the appropriate box and fill out the information below)

OBAT providers must employ Navigators (registered nurse, licensed practical nurse, social worker, bachelor’s degree with two years live experience or an associate’s degree with four years live experience).

Does the practice employ Navigators?

- No, the practice does not employ Navigators.
- Yes, the practice employs Navigators.

Would you be interested in providing OBAT services for Horizon NJ Health members?

- Yes, I am interested in providing OBAT services for Horizon NJ Health members.
- No, I am not interested in providing OBAT services for Horizon NJ Health members.
